LOCAL COMPANY RECEIVES ROADWAY SAFETY INNOVATION AWARD

Fredericksburg, Va. – A local company committed to advancing roadway safety was recently awarded a **FIRST PLACE** “Innovation Award” for their creative new product used on America’s roadways.

Douglasville’s Advanced Striping Equipment, Inc. produces the product – *the ThermoMarkII Double Drop Applicator* – that is a walk-behind roadway striper that effectively stripes the roadway to safely guide motorists.

The prestigious award was presented in late January during the American Traffic Safety Services Association’s (ATSSA) Annual Convention and Traffic Expo in San Antonio, Texas. Since 1969, the ATSSA convention has been the largest roadway safety convention of its kind in North America, featuring the latest in products and services that save lives on roadways.

Pictured below with their award-winning product are (left to right) Rusty Clark, Tom Waxler and Rowlin Mosley. For a high-resolution version of the photo, please contact James Baron at the telephone number above.
