

**Video Teleconference  
Incident Traffic Control  
for Responders-Grant**

**October 16, 2008  
9 a.m. - 1 p.m. CST**

An FHWA  
Grant Sponsored Course  
Under grant agreement:  
#DTFH61-06-G-00004

**UGPTI/ND SU**

The 4-hour course presents a basic overview of temporary traffic control (TTC) standards and guidelines for incident responders. It specifically discusses principles and concepts of temporary traffic control presented in the Manual on Uniform Traffic Control Devices (MUTCD) Section 6I, a Federal standard which now specifically addresses traffic incident management areas. The MUTCD divides traffic incidents into three general classes of duration, each with unique traffic control characteristics and needs. These classes are:

- A. Major - expected duration of more than 2 hours
- B. Intermediate - expected duration of 30 minutes to 2 hours; and
- C. Minor - expected duration under 30 minutes.

The course discusses the unique traffic control characteristics of each class and their traffic control needs to meet the MUTCD guidelines.
