

American Traffic Safety Services Association

ATSSA'S Webucation Center

will host the following Webinar:

Standard Guardrail Installation: A How To

This webinar will focus on standard guardrail installation techniques.

Learn about pre-installation considerations that you should be aware of such as preliminary project analysis, job site analysis, vehicles and equipment analysis, and project personnel safety analysis.

From there we will move into standard installation with a focus on plan review, site grading, and material storage and handling. Participants will learn about layout (line and grade), project site material handling, post driving, guardrail mounting, and terminal installation. Finally, other considerations and final alignment will be discussed.

Speaker: John Durkos, Road Systems, Inc.

Moderator: Tom Ervin, United Rentals, Inc.

This presentation is available of CD-ROM

ATSSA Members: \$29.95

Non-Members \$49.95
