

American Traffic Safety Services Association

ATSSA'S Webucation Center

will host the following Webinar:

Guardrail Installation Training- Part II *Inspection & Maintenance*

This session will provide the viewer with a review of proper installation inspection procedures, appropriate repair and maintenance requirements, and guidelines for accurate reporting and documentation.

What You Will Learn:

- Guidelines for installation inspection
- Maintenance requirements and best practices
- Proper documentation techniques

Speaker:

Chad Heimbecker, Bryson Products.

Chad has been working in the highway safety industry since 1997 as a technical member of Bryson Products; a supplier of highway guardrail barriers, crash cushions and other safety devices. In addition to roles in information technologies, engineering support sales and marketing, he has been involved with the design and full-scale crash test evaluations of a number of hardware safety improvements. His experience includes membership in Roadside Safety Committees for the Transportation Research Board, American Association of State Highway Transportation Officials and within ATSSA developing the Longitudinal Barrier Systems training course

This presentation is available of CD-ROM

ATSSA Members: \$29.95

Non-Members \$49.95
