ATSSA'S Webucation Center

MUTCD PART 6 -Session 2

Advance Warning

Session 2 of ATSSA's *continuing* series of webinars on the MUTCD Part 6.

The advance warning area is the section of highway where road users are informed about the upcoming work zone or incident area.

This session will focus on a comprehensive review of the standards from section 6F on regulatory, warning and guide signs used in various types of advance warning areas of lane closures, lane shifts, road closures and detours.

What will be Covered:

- Applications and placement of signs
- Concept of retroreflectivity
- Types of enhancements used for signs

Presenter: Catherine Witt, ATSSA Instructor. Ms. Witt has over 18 plus years experience in temporary traffic control; a subject she is passionate about. Ms. Witt travels all over the country teaching ATSSA courses. Ms. Witt consistently receives rave reviews from her students regarding her ability to take technical information and apply it to "real life" situations. Register now for this informative and valuable webinar!

This presentation is available of CD-ROM

ATSSA Members: \$29.95
Non-Members **\$49.95**
