

American Traffic Safety Services Association

ATSSA'S Webucation Center

will host the following Webinar:

Design and Operation of Nighttime Temporary Traffic Control in Work Zones

April 18, 2006 2-3:30 p.m. EST

This webinar will discuss factors that influence the design and operation of nighttime work zones. Among the topics discussed will be factors affecting the feasibility of nighttime work zones, nighttime adjustments to a traffic control plan, worker visibility, lighting requirements, and nighttime typical applications. The webinar is based on the Manual of Uniform Traffic Control Devices and NCHRP reports 475 and 476.

What you Will Learn

1. Temporary traffic control (TTC) factors that influence the design and operation of nighttime work zones
2. Special nighttime considerations
3. Work zone lighting requirements

Presenter: Juan M. Morales, President, J.M. Morales & Associates

This presentation is available of CD-ROM

ATSSA Members: \$29.95
Non-Members \$49.95
