

**American Traffic Safety Services Association
National Association of County Engineers &
International Bridge, Tunnel and Turnpike Association**

will co-host the following Workshop & Webinar:

Sign Retroreflectivity -New National Standards

February 12, 2008 8:30-10:00 a.m. CST

COMING SOON - a national standard for minimum maintained sign retroreflectivity! And, a webinar to provide you with important information about these new requirements.

This webinar will provide you with:

- 1) A detailed explanation of the Final Rule.
- 2) An explanation of what public agencies will need to do to be in compliance.
- 3) Clarification of some common misunderstandings about the rule.
- 4) An explanation of the implementation timetable for each agency to be in compliance.

You will also hear from a local agency representative who will explain how he is planning to manage his local signs to meet the new regulations.

This session is planned based on the expectation of Final Rule publication. If the Final Rule has not been published prior to this session, the session will be postponed.

Speaker:

Greg Schertz, FHWA Retroreflectivity Team Leader

Moderator:

Paul Carlson, Texas Transportation Institute
